

BUNHEANG CHHENG

Fullstack Developer

ABOUT ME

I am a Fourth-year Computer Science student with a strong interest in software development and web technologies. I have hands-on experience building full-stack applications using technologies such as JavaScript, React, Node.js, Express, MySQL, and Django. I enjoy solving problems, learning new tools, and turning ideas into practical solutions. I am motivated, detail-oriented, and eager to gain real-world experience while continuously improving my technical and teamwork skills.

ACADEMIC BACKGROUND

Bachelor of Computer Science in Software Engineering 2024 - 2027
Cambodia Academy of Digital Technology (CADT)

Fourth-year student with hands-on experience in web development, mobile application and software engineering projects.

EXPERIENCES

Room Rental Management System - JANUARY - MARCH 2025
School Project

Backend Developer

- Built a Java desktop app with Swing and MySQL to manage buildings, rooms, tenants, and billing.
- Designed role-based portals for landlords and tenants with secure login and real-time data updates.
- Automated rent billing, payment tracking, and balance calculation using clean OOP and MVC architecture.

Real-Time Chat Web Application - AUGUST - SEPTEMBER 2025
School Project

Fullstack Developer

- Developed a real-time fullstack chat web application using React, Node.js, Express, and MySQL with a responsive UI built using Tailwind CSS.
- Implemented secure user authentication with JWT, real-time messaging using Socket.IO, and persistent data storage using Sequelize ORM.
- Integrated Cloudinary for image messaging and designed RESTful APIs following MVC architecture for scalability and maintainability.

CADT Freshman Coding Championship MAY - JULY 2025
Configuration Team Member

- Selected as part of Config team of the project by the CADT Coding Club to design and build a custom leaderboard system for the CFCC competition.
- Part of the development and delivery of a real-time leaderboard web application integrating HackerRank challenges to improve scoring transparency and streamline event operations by working closely with organizers.

#32k, St.62, Russey Kao, Phnom Penh

HARD SKILLS

- **Programming languages:** Java, Dart, Javascript, PHP
- **Framework:** React, Express.js, Flutter, Django, Laravel
- **Database:** MySQL, PostgreSQL, MongoDB
- **Design:** UX UI Design, Basic Video Editing
- **Basic Cybersecurity**

SOFT SKILLS

- Problem Solving
- Critical Thinking
- Time Management
- Adaptability and flexibility
- Communication

LANGUAGES

Khmer: Native Language

English: Fluent

Fitness Tracking Application – School Project

NOVEMBER – JANUARY 2026

Fullstack Developer

- Developed FitTrack, a personalized workout tracking mobile application using Flutter, designed for both gym and home fitness users.
- Implemented customized workout plans, exercise library, progress tracking, and analytics dashboards with charts and statistics.
- Integrated offline support using SQLite, user fitness assessments, and multiple workout types for a complete fitness experience.

Automata Visualizer – School Project

JULY 2025

Backend Developer

- Designed and implemented the Automata project to demonstrate key concepts in automata theory and computational algorithms
- Applied Python and additional programming languages for developing, testing, and optimizing automata-based solutions
- Engineered efficient code structures and robust logic to support educational and practical applications in computation

AUREA Fee Estimator – School Project

SEPTEMBER 2025 – PRESENT

Backend Developer

- Developed AUREA, a smart web-based pricing calculator for freelance designers using React, TypeScript, Vite, Express, and Supabase.
- Built an intelligent rate estimation system that calculates fair hourly and project pricing based on real business costs, profit margins, and billable hours.
- Integrated AI-powered brief analysis using Google Gemini to extract project scope, duration, and requirements from uploaded PDFs, streamlining pricing and invoicing workflows.

CERTIFICATION

Java Basic Certificate

FEBRUARY 2025

Hackerank, Online Programming Platform

Java Masterclass 2025: 130+ Hours of Expert Lessons

SEPTEMBER 2025

Udemy, Online Course

The Complete Full-Stack Web Development Bootcamp

SEPTEMBER 2025

Udemy, Online Course
